

Preannounced Discontinuance KODAK PRECISION LINE Duplicating Film LPD7 / 4911 KODAK PRECISION LINE Duplicating Film UTD7 / 4914

Effective September 2003, or until inventories are depleted, KODAK PRECISION LINE Duplicating Film LPD7 / 4911 and KODAK PRECISION LINE Duplicating Film UTD7 / 4914 will be discontinued. The suggested replacement is KODAK PRECISION LINE Duplicating Film UDA7. UDA7 can be processed under the same conditions as LPD7 or UTD7, however UDA7 is roomlight handling (UV filtered or yellow fluorescent) and must be exposed with a high-density (1.5kw) metal-halide light source.

The following products will be discontinued.
