High-quality automated CD writing for the professional lab.

The Rimage range of CD writers offers the Pro Lab everything it needs to output high quality CDs for the professional imaging market.

A variety of models allows for different production capacities enabling single or multiple automated disc writing, label printing and customization.

Key Features & Benefits (model dependant)

- Auto recording of discs for efficient productivity
- 'Turnkey' solutions to start production as quickly as possible
- Full color thermal label printing to maximise customisation with instantly dry images
- Multiple drives (model dependant) for maximum productivity
- Easy-to-use customer interface to maximise labour utilization
- 'Perfect Print' – allows for exact registration of customised printing on pre-screened/branded CDs

Product availability

RIMAGE CD Writers are supplied by Kodak in Europe and BREMSON Inc. in North America. Please contact your Kodak representative for full details.

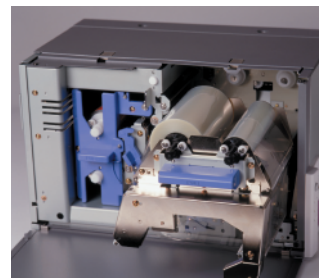

A world of support

We support you with a depth of resources that only a company the size of Kodak can provide. We have a global network of dealers, people, parts, information, and communications, to assure your satisfaction with our products. And they are right at your doorstep.

For further details and the most current System Requirements, see your Kodak representative or visit www.kodak.com/go/prolab

If you have any questions or need assistance, or require further information about this or the complete range of Kodak Products, please contact your local supplier of Kodak products.

Because of our constant endeavor to improve quality and design, modifications may be made to products from time to time. Details of stock availability and specifications given in this publication are subject to change without notice. All weights and dimensions are approximate.

RIMAGE writers not only automatically load, record and stack discs but even print the label
