

FIVE REASONS TO UPGRADE TO KODAK PRINERGY PROOFING (KPS) SOFTWARE VERSION 11.0

1

Improved Media Configuration Accuracy

New visual guide to simplify paper feed adjustments.

2

Save Time

New Usage Choice presets for computing the best TIL (Total Ink Limit) and correct Color Gamut.

3

Highest Quality Proofs

New Gamut Check Features ensures proofs meet the intended media configuration.

4

Greater Stability

Improved JTF (Job Ticket File) compatibility for better connection with PRINERGY direct connect (NPROOF).

5

Updated Processing Technology

WINDOWS 2022 support and Corretto replaces Oracle Java for improved reliability and security.
