

KODACOLOR Film-to-Fabric

Kodak was the first brand to offer a complete film-to-fabric (FTF) system solution for garment printing. Today, Kodak's KODACOLOR print systems provide fabric designers, brands, printer manufacturers, and fabric printing businesses with high-quality options to meet all their customers' printing demands. This system ensures reliable compatibility of the chemistry between the three main components including ink, film and powder.

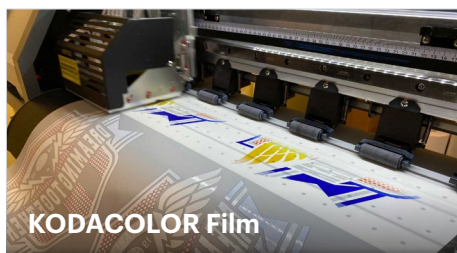

Kodak Expertise

With over 30 years' experience producing and selling digital inks for thermal piezo and continuous inkjet systems, Kodak has developed world class print systems with benefits including:

- Color inks delivering a bold and vibrant color gamut and true dark black
- Brilliant bright white for greater color enhancement
- High jetting reliability for increased printing productivity
- Certified with Oeko-Tex Eco-Passport for cleaner, safer textile production

KODACOLOR Film-to-Fabric
