

THE ULTIMATE PRINT PORTAL

Quickly access the power of PRINERGY using our Software-as-a-Service (SaaS) workflow solution.

This centralized content management solution enables print buyers to collaborate and manage the file approval process for easy routing to any local digital print device or on-premise workflow. Access puts you and your customers in control from upload to approval with ease and accuracy, from anywhere in the world.

Hands-Off Job Approval Process

Puts the print buyer in control of file management from upload to approval, using Smart Review for file upload, annotation, preflight and approval.

Immediate Start-Up

Browser-based with no installation or professional services.

Automated File Processing

Files are processed using Kodak's industry-leading Preflight+, color management, file management, backup, trapping and routing software.

Secure Storage

Securely store and organize files for easy retrieval, backed by Microsoft Azure.

Built-in Intelligent Layout

Reduces waste and errors by dynamically imposing files for any production line.

Minimal Bandwidth Requirements

SaaS product offering provides convenience with standard internet and no downtime.

Digital Workflow

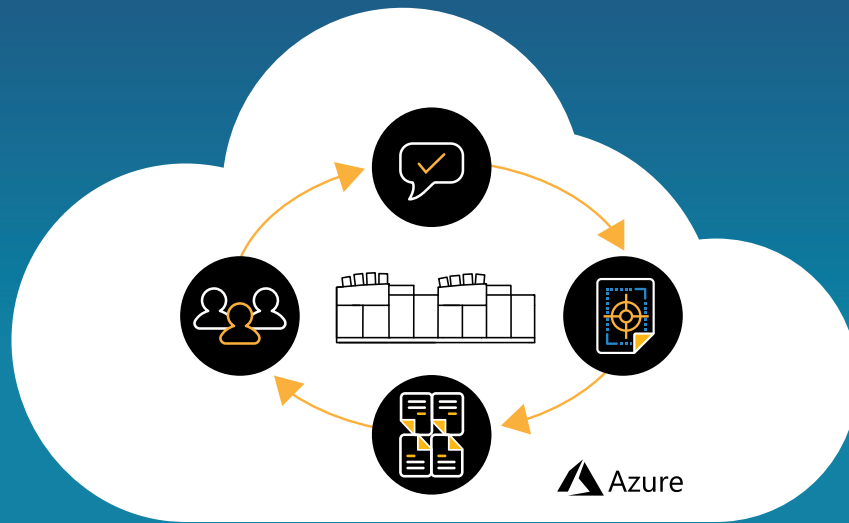

Seamlessly route files directly to any digital print device or on-premise production workflow software.

Easily Scalable

PDF hub processing built on PRINERGY code base.
