

CUT TURN TIMES AND PRODUCTION COSTS

Produce faster, more accurate impositions that maximize press sheet usage and boost productivity.

Imposition is at the heart of production costs, affecting throughput, material usage and labor. KODAK PRINERGY PREPS Imposition Software helps you take control of this critical step, saving time, controlling costs and improving productivity. With an intuitive interface, a comprehensive suite of powerful features optimized for commercial, publication and package printing, and a broad range of JDF functionality, PREPS Software has become one of the most widely used tools in today's printing industry.

Reduce costs

Template-based impositions eliminates errors and waste for new and repetitive jobs, providing greater control of substrate and labor costs.

Accelerate cycle times

Save time and create efficiencies using a library of templates and fold patterns with various smart automation features that reduce manual steps.

Improve accuracy

Eliminate error, increase accuracy and drive faster turnaround times.

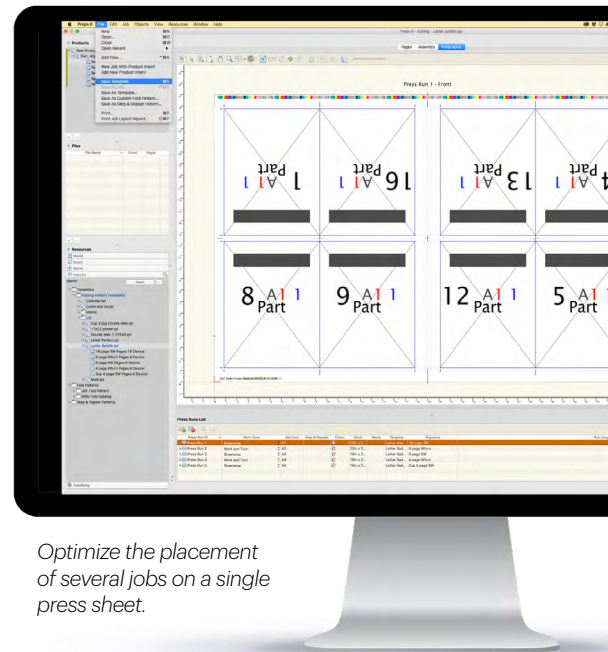

Increase productivity

Produce more jobs faster with reusable job templates, automatic adjustments on the fly from job to job, and features that maximize press sheet usage based on signature plans and job intent.

Expand your business

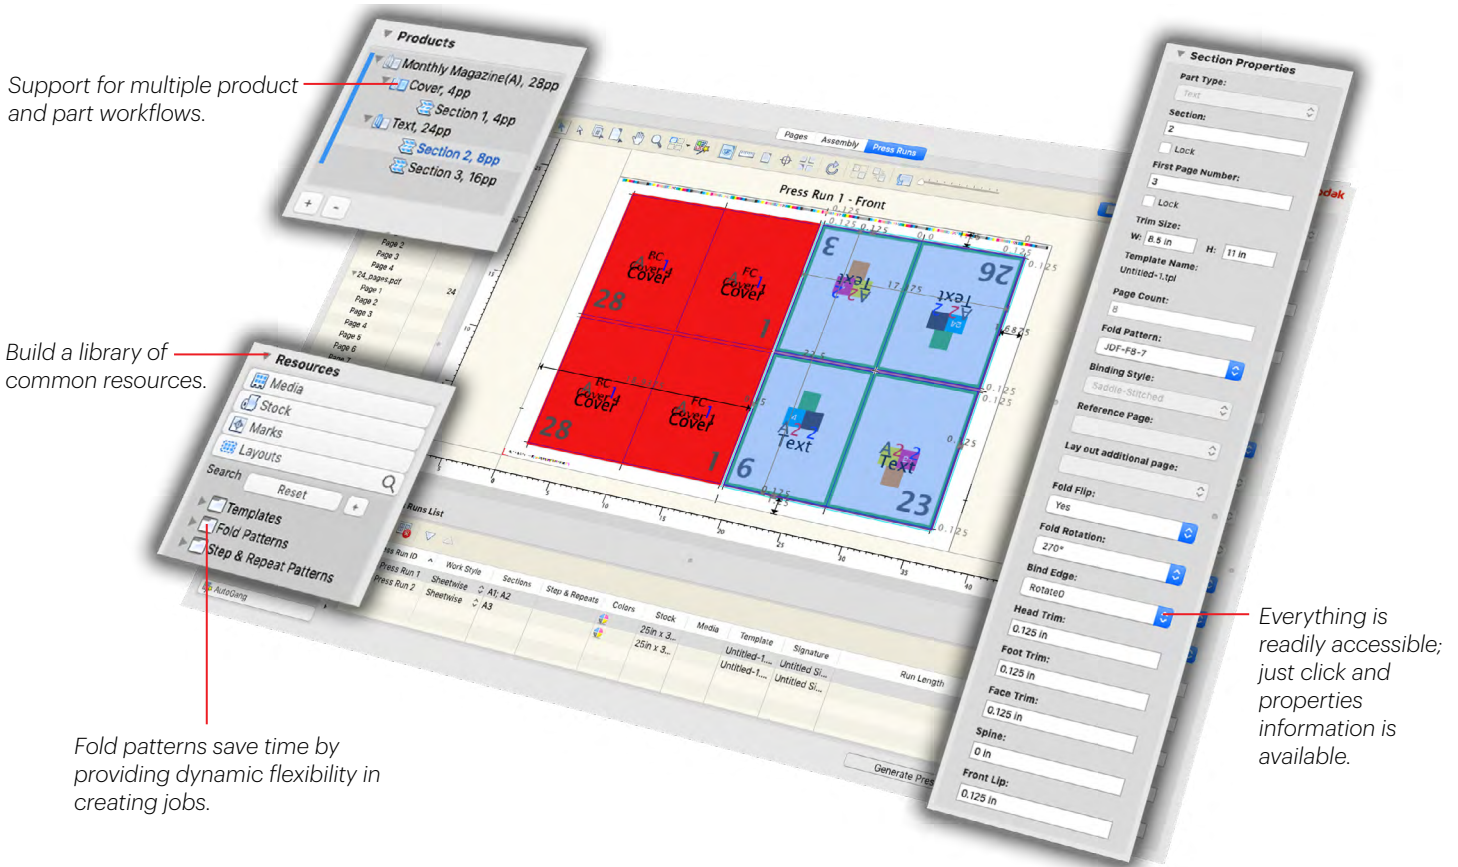

Layouts for both offset and digital label jobs can be easily handled in PREPS Software. If you are expanding into the packaging market, consider KODAK PANDORA Step-and-Repeat Software: it is specifically designed to automate complex packaging layouts.

Optimize the placement of several jobs on a single press sheet.

Use “Generate Press Runs” to optimize press sheets based on job intent and signature plans.

Support for multiple product and part workflows.

Build a library of common resources.

Fold patterns save time by providing dynamic flexibility in creating jobs.

Everything is readily accessible; just click and properties information is available.

KODAK PRINERGY PREPS IMPOSITION SOFTWARE

Operating Systems	Server: WINDOWS 10/11 and macOS 11/12/13 (M1/M2 and Intel)
Key Features	<ul style="list-style-type: none"> • Integrated Workflow • Intelligent Smart Marks • Job Template Support
Optional Add-ons (Partial Listing)	<p>Dynamic Print Planning: Radically optimize print planning and print more, spend less:</p> <ol style="list-style-type: none"> 1. Efficiently manufacture products that share similar production attributes within a given time window. <ul style="list-style-type: none"> • Due date and time • Plate type • Printing press • Colors (Inks or Coatings) • Substrate • Cutting equipment 2. Automate creation of the manufacturing plan and create a cost optimized set of print-ready production layouts 3. Seamlessly integrates with PREPS & PRINERGY Workflow. <p>Marks JTP: Reduce processing bottlenecks and improve speed by purchasing additional Marks JTPs to your PRINERGY Workflow.</p>
