Change in Splice Tape Adhesive

Due to changes in chemical availability the supplier of KODAK Splicing Tape has had to make some formulation changes. Because of this you may notice a change in the way the KODAK Splicing Tape unwinds from the roll. While the tape remains clear and can produce an excellent splice, it is now necessary to draw the tape in a single, smooth continuous motion from the roll to prevent stop lines from appearing across the tape. Both in testing and in the field, this has been implemented reliably and with good results.

This notification relates to the products listed below.

CAT No.	PRODUCT
1821255	KODAK Splicing Tape / Polyester Clear / 25 mm x 15 m / No Perf
8076762	KODAK Splicing Tape / Polyester Clear / 15 mm x 15 m / No Perf
8668055	KODAK Splicing Tape / Polyester Clear / 38 mm x 15 m / No Perf
