

INTRODUCING WIDE-FORMAT DIGITAL INKJET PRINTING FOR HOME DÉCOR

KODAK STREAM INKJET TECHNOLOGY

NEW!

- Virtually indistinguishable from gravure with no repeats, for virtually endless runs
- Color consistency, robustness and durability that are comparable to gravure
- Wider color gamut, low cost and image permanence with water-based nano-particulate pigment inks that are non-metameric for visual consistency
- Easy color matching for reprints
- Ideal for laminate flooring and furniture, wood-grained cupboards, stone-designed countertops, wall coverings ... and more!

REDUCE PRINTED INVENTORY WASTE WITH INKJET PRINT-ON-DEMAND TECHNOLOGY

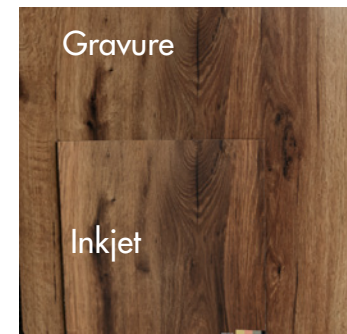

Imagine printing laminate and home décor substrates in a highly efficient process that combines the performance of traditionally-printed substrates with the advantages of continuous inkjet technology:

- Reduce inventory costs by printing on demand
- Leverage the ability to deliver high-value customization
- Benefit from a broad range of design offerings

With lightfastness, color consistency and durability that are comparable to traditional methods, the economics of Kodak's continuous inkjet technology within this market space are compelling:

- Elimination of costly gravure cylinders and a time-consuming color matching process
- Competitive running costs through advantaged ink production
- The use of a single white substrate for all colors in the home décor gamut space

Kodak Stream Inkjet Technology for laminates produces a continuous flow of round, uniform drops for exceptional productivity and image quality. Stream delivers the fastest high-speed productivity in the market, and performs consistently at any coverage level without disrupting ink flow or adjusting print speed. The modular design of the lineheads allows flexibility to design for optimal print widths. **Kodak** Stream Inkjet Technology integrates seamlessly into existing printing and laminating operations.

Laminate flooring printed using **Kodak** Stream Inkjet Technology is virtually indistinguishable from gravure-printed laminate.

Reduce inventory costs by printing home décor substrates on demand.
