

KODAK Mobile CTP Control App

A one-of-a-kind mobile app that lets you remotely control and monitor your CTP device.

Know immediately when your CTP devices need attention, no matter where you are. Check status with a quick glance at your mobile phone so there's no more waiting around to load more plates. Lastly, no wasted time while the machine sits idle, waiting for you.

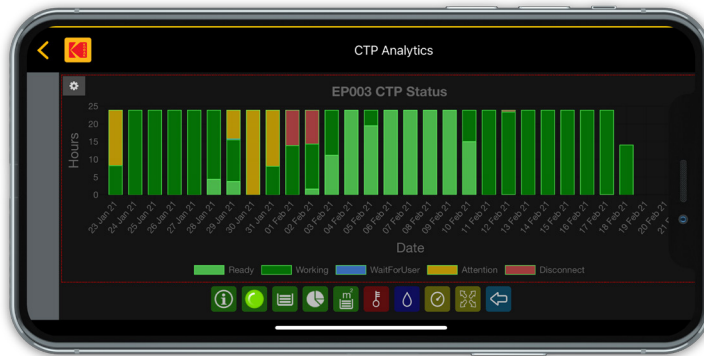

Identify problems and improve efficiency with data analysis features

With the latest version of the KODAK Mobile CTP Control App, you have access to powerful data on your mobile device or on a desktop computer. Customizable reports present current and historical data so you can make informed decisions to increase productivity and efficiency in your plate making operation.

Loaded with features to help you streamline your plate making operation.

- Monitor up to 10 KODAK CTP Devices.
- App shows whether CTP device is running or stopped for any reason, plus detailed information such as current job, jobs in the queue, active plate cassette count, environmental conditions, event history, and more.
- Push notifications alert you when a device needs attention.
- View details of jobs in the queue, resubmit jobs directly from the app, and lock or unlock the queue.
- Run flexible, customizable reports on your mobile device, desktop, or laptop computer, or export the data to use in a separate system.
- Your data is protected with the latest security from Microsoft.

CTP Operating Status

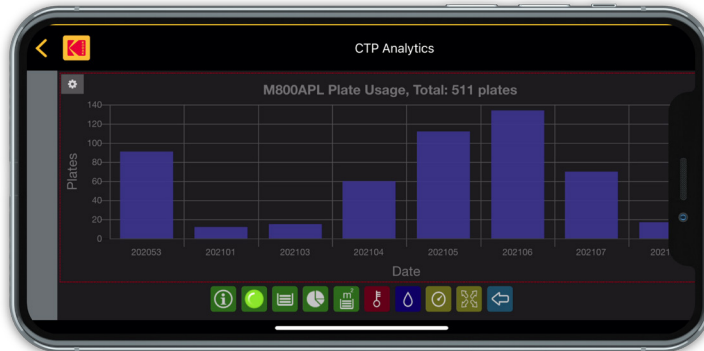

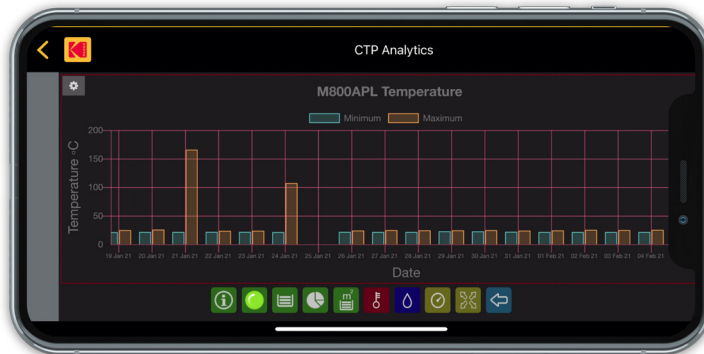

Plate Usage

Environmental Conditions (temperature, humidity, or air pressure)
