KODAK VERITA 200D Color Negative Film 5206 / 7206

KODAK is pleased to announce the introduction of KODAK VERITA 200D Color Negative Film 5206 / 7206. The following additions will be included in the next update of the KODAK Motion Picture Products Price Catalogs.

KODAK VERITA 200D Color Negative Film is a medium speed, daylight balanced film stock that delivers bold colors across a range of imagery. VERITA 200D Film has an anti-halation undercoat with a process surviving anti-stat backing layer that has been designed to reduce dust accumulation. It incorporates Kodak's proprietary advanced Dye Layering Technology (DLT). VERITA 200D has an engaging, shorter dynamic range when compared to KODAK VISION3, offering classically cinematic results.
