

KODAK PHARMACEUTICALS

**Domestic. Dependable.
Designed for You.**

YOUR FLEXIBLE AND RESPONSIVE PARTNER

As a trusted US-based company, Kodak can provide the high-quality products you need when you need them.

With Kodak, you will experience:

- Timely delivery
- Flexible order fulfillment
- Collaboration with your scientists to create the formula needed for your applications in an FDA-registered cGMP facility

UNCOMPROMISING QUALITY

Kodak's brand-new cGMP facility (with ISO 13485 Certification expected in 2027) has a modern multi-step water purification to ensure sterility. Our water is defined as USP WFI grade specifications, ensuring the highest level of purity and safety. The Water for Injection (WFI) processes include filtering, reverse osmosis, de-ionization, UV disinfection, and distillation. These rigorous steps create Water for Injection that meets or exceeds the established standards, providing you with the uncompromising quality you deserve.

COMMITMENT TO SUSTAINABILITY

Kodak's cGMP-compliant facility has:

- Energy-efficient lighting and custom process equipment designed for optimized energy use, reducing greenhouse gas emissions.
- A cutting-edge water sterilization system that minimizes water consumption while producing medicinal-grade water with minimal waste.
- Sustainability advantages of repurposing an existing Kodak building, which reduces construction waste and conserves resources by utilizing existing structures.

A LEGACY OF UNCOMPROMISED EXCELLENCE

Kodak has over 130 years of history in research and development for advanced materials and chemicals and has years of experience supplying unregulated Key Starting Materials (KSMs) to premier US and multi-national CDMOs and US-based innovators.

As a trusted partner supplying KSMs to the pharmaceutical industry, we now offer a growing portfolio of sterile, ready-to-use solutions. These include PBS in multiple concentrations and grades, WFI across grades, and 0.9% Normal Saline to support R&D and manufacturing.

Our state-of-the-art cGMP facility delivers consistent, high-quality products you can rely on from Kodak.

Kodak's core strengths include R&D, regulatory expertise, technical innovation, manufacturing scale-up, custom reagent services, and supply chain management.

EASTMAN BUSINESS PARK

- 1,200 acres
- 100 buildings
- 1.5 million square feet of laboratory, manufacturing, office, and warehouse space
- 30 miles of roads
- 17 miles of railroad track

SUPPLY CHAIN SECURITY

- State-of-the-art domestic production
- Rigorous testing and certification
- Reliable delivery of high-quality products

FACILITY & PROCESS CAPABILITIES

- FDA-registered cGMP facility
- Capacity up to one million liters per year
- ISO 13485 certification*
- Integrated Water for Injection (WFI) system with distillation
- Clean steam and purified process air

*In process, expected 2027
