

5 REASONS TO UPGRADE TO V11.5

1

Enhanced RBA Support

New actions accelerate decision making by enabling a clearer, more streamlined customer review and approval process

2

Synchronized Email Addresses Across Systems

Eliminates manual updates in multiple places and reduces login inconsistencies

3

Improved Security

Strengthened IIS configurations reduce vulnerabilities and improves performance and resiliency

4

Faster Job Management

Save time and increase productivity using multi-job deletion using Shift-Click or CTRL-Click in the jobs view

5

Updated Libraries & macOS Support

Improved overall responsiveness, stability and security for MATCHPRINT Virtual and PRESSPROOF, now running on the latest macOS
