

KODAK Specialty Chemicals

Your vision. Our experience. The perfect chemistry.

Kodak provides a unique specialty chemicals operation for custom organic synthesis with toll manufacturing capabilities from pilot kilos to several hundreds of metric tons and a proprietary database of over 100,000 molecules.

Kodak Specialty Chemicals is located at Eastman Business Park which is a 5-mile long, 1200-acre facility, and a "city within a city" in Rochester, NY. Kodak employs its multipurpose facilities and principles of six-sigma and lean manufacturing in process development and operations to serve many diverse markets.

KODAK Specialty Chemicals

Equipment

ISO 9001 certified custom and toll manufacturing specializing in complex, multi-step chemical syntheses.

Batch Reactors

88 G/L and SS Reactors
Distributed Controls
Pilot to 1000-gallon scale

Isolation Equipment

Over 25 centrifuges, filter and membrane presses

Drying

Multiple rotary and tray drying

World Class Analytical Services

Complete portfolio of capabilities in house

U.S. based global operations

Distillation facility for solvent recovery

Integrated Global Operations

Featuring established development/manufacturing assets and infrastructure

Power plant producing electricity, steam-chilled water.
Water recycling and treatment facilities.
Global sourcing, warehouse with free trade zone, worldwide shipping.
HSE personnel, on-site fire department, hazmat and 24/7 gated security.
Expertise in custom synthesis and toll manufacturing.
Innovation ecosystem to leverage technology, facilities, equipment and manufacturing.

Markets

Contract Manufacturing (CMO)
Pharmaceutical
Agrochemicals
Industrial Specialties
Personal Care
Electronics
Graphics/Security

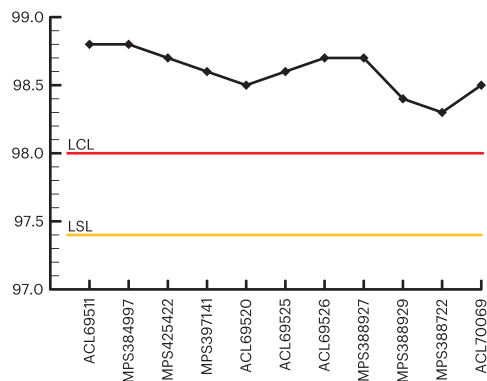

Disciplined Approach

Over 1500 active manufacturing processes.
Stage gate process development.
Web access to quality and process control dashboards.

Quality

Statistical quality control processes throughout manufacturing.

Design of experiments methodologies applied in process development and troubleshooting applications.
