## Catalog Number Additions for Selected KODAK Photochemicals

The following catalog number changes are taking place for selected Photochemicals in Europe. Each catalog number affected has a replacement item that is equivalent. Some packaging may contain additional languages or may have other minor differences in packaging appearance.

Changes will take place on a stock turnover basis and will be reflected in the next update of the KODAK Motion Picture Products Price Catalogs for Europe.

PREVIOUS CAT Nos.	PRODUCT DESCRIPTIONS	NEW CAT Nos.

5160437	KODAK Stabilizer Additive / 1 qt	7505217

\* KODAK ECP-2E Kit Fixer and Replenisher is being replaced with a universal fixer, KODAK ECN-2/ECP-2E Fixer and Replenisher. When using this Fixer in ECP-2E processes, do not alter replenishment rate. This material may be added directly to the existing ECP-2 Fixer in replenishment tanks (no need to dump). The pH of this fixer is slightly higher than the previous ECP-2 Fixer (aim range of 7.75-7.93 pH). If blending with the previous ECP-2 Fixer, pH will gradually season to the new specification.
