

## **KODAK** Certified Pre-Owned CTP Systems

# Peace of mind. Guaranteed.

### **Engineered to last**

As the inventor of thermal CTP systems, Kodak has unique expertise in optimizing CTP performance and designing for extended operational life.

With decades of experience in engineering, manufacturing and servicing KODAK CTP Devices, our global team continues to innovate and build best-in-class devices that our customers can depend on for their business. Day in, day out.

### **Unique access to high-quality, pre-owned CTPs**

Kodak CTP equipment is built to perform for the long run. We can confidently offer quality, pre-owned Kodak CTP equipment that is certified to perform to original factory specifications and is protected by a full warranty.

With 20 years' experience in recertifying Kodak used devices, we have access to a wealth of detailed usage and service history. Qualified devices are eligible for our KODAK Certified Pre-owned (KCP) CTP program. After a meticulous certification process, each device is made available with a selection of automation, speed and resolution options, so you can choose a system that best fits your business needs.

### **Stringent inspection and certification process**

The multi-point evaluation process for KCP equipment is extensive, ensuring reliable operational performance for years to come. Guaranteed.

Our certification process begins with a comprehensive inspection by factory-trained technicians, ensuring the equipment is fundamentally in good operating condition. Filters are replaced, and parts are upgraded or repaired as necessary.

The result is a CTP device that is both certified to meet the same factory specifications as the original device and updated to the latest controlled release, the latest software and, in most cases, with a new computer. Only original KODAK parts are used, and final imaging tests are performed to the same demanding standards used for newly manufactured equipment.

### **Affordability that may surprise you**

It all adds up to a low-risk, high-return investment in an affordable CTP platform - backed by one of the most comprehensive used-CTP benefits packages in the industry.

Every KCP system is eligible for a KODAK Support Plan, ensuring worry-free operation for your business.

Contact your sales representative for a list of specific devices currently in inventory.
