

Reduce Production Costs

Streamline prepress operations with a flexible workflow system that improves efficiency and maximizes ROI.

KODAK PRINERGY Evo Workflow offers a low-cost solution for printers who don't currently need a fully automated, data-driven workflow. Built on proven PRINERGY PDF-processing technology, PRINERGY EVO Workflow can help printers of all sizes improve production efficiency and remove hidden costs. Easy installation and upgrades mean that you can be up and running in minutes!

Drive fast return on investment

With a low cost of entry and three configuration options, PRINERGY EVO Workflow offers fast ROI to just about any print operation.

Produce best-in-class quality output

File normalization improves print stability, while state-of-the-art color management ensures that the correct color settings are applied to maximize quality and consistency, even on complex jobs.

Save time

Online submission, job tracking and management combined with reliable high-speed processing translate to reduced cycle times and improved productivity.

Connect to any CTP output device

Open integration expands your output choices to any 4-up and 8-up platesetter.

Scale up when you need to

PRINERGY Evo Workflow is fully upgradeable to PRINERGY Workflow, enabling you to add functionality as your business needs change.

With the Process Template Palettes and the Process Viewer, you can submit files to PRINERGY EVO Workflow as well as track progress and status for both running and completed processes.

A commitment to innovation

Kodak continues to invest in both performance and security with a steady stream of upgrades released automatically every nine months, on average, to customers with a service contract.
