IMPRINTING SYSTEMS

Make your traditional press **digital**.

# LEVERAGE THE BEST OF **BOTH WORLDS**

## **MAXIMIZE THE PROFIT POTENTIAL OF YOUR EXISTING EQUIPMENT**

The KODAK PROSPER Imprinting Systems, built on Kodak Stream Inkjet Technology, can energize your top line with high-quality, high-speed variable capabilities that integrate directly into your offset, flexo and finishing equipment. When you add PROSPER S-Series or PROSPER Plus print heads to your existing equipment, you'll be able to produce a range of new, personalized applications that add value for your clients by helping them achieve their business objectives.

## **GET INLINE**

Historically, adding variable content to traditionally-printed pieces was a time-, labor-, and cost-intensive process, with the traditionally-printed forms moving back and forth between a press, inventory, imprinting and finishing. With PROSPER Imprinting Systems, variable content is added inline on your existing press or finishing equipment, so you are better able to meet your customers' requirements for cost control and turnaround.

By keeping customized printing on your printshop floor, you keep profits in-house, while increasing customer satisfaction.

## **QUALITY COUNTS**

Resolution up to 600 x 900 dpi, small drop size, precise drop uniformity and placement, along with exceptional optical density and permanence, mean that PROSPER Imprinting Systems produce image quality that is difficult to distinguish from traditional print, with the added value of variability. Plus, you'll be able to print a wide variety of standard substrates—from uncoated to glossy—with no loss of speed or quality.

## **MOVE AT THE SPEED OF YOUR BUSINESS**

Running up to 900 meters per minute (3,000 feet per minute) with a host of automated maintenance features, easy-to-use operator replaceable printheads and exceptional durability mean you can turn jobs around as quickly and reliably as you always have—only now, they'll be more valuable for your customers and more profitable for you.

## **DRIVEN WITH POWER**

PROSPER Imprinting Systems are driven by industry-leading controllers that offer an easy-to-use graphical user interface (GUI) for efficiency, and provide a powerful digital front end for properly interpreting and rasterizing data.

Customization

## OFFER YOUR CUSTOMERS HIGH-VALUE FEATURES THAT HELP THEM REACH THEIR BUSINESS OBJECTIVES:

- Targeted promotional offers and coupons
- Personalized text and images
- Localized information
- Geocoded maps
- Serialized codes
- Security codes
- 2D or 3D bar codes
- Anti-counterfeiting features

## RANGE OF EKTACOLOR INK OPTIONS

Choose just the right KODAK EKTACOLOR Ink for your application, with a range of options from Kodak that are optimized for printing on PROSPER Imprinting Systems:

- Nanotechnology pigment EKTACOLOR Inks offer outstanding levels of permanence, including scratch, fade, and water resistance and rich, dark blacks on standard coated offset stocks.
- Dye-based EKTACOLOR Inks offer exceptional cost efficiencies.
- Spot color inks offer precise color-matching to corporate or brand colors.
- Security inks can help protect against counterfeiting. These unique invisible inks fluoresce to a bright color under UV light.
- A variety of specialty inks are available, including a non-contact, food-safe ink for packaging and direct skin contact inks for product decoration.

## BUILT-IN FLEXIBILITY

With a print width of 105.6 mm (4.16"), PROSPER Imprinting Systems provide exceptional scalability. You can start small, then add additional imprinting heads for wider widths and more colors. Depending on the configuration, systems can include up to 12 print stations and 24 printheads, and can be easily integrated to existing equipment using Kodak or third-party solutions. You can also start with monochrome printing, then add spot and process colors as your business needs evolve.

## OPTIMIZED FOR SUCCESS

Kodak's fully integrated solution, which includes EKTACOLOR Inks, KODAK OPTIMAX Primers, and fluids and jetting modules, is optimized for quality and performance. Establish a new competitive advantage today, with a KODAK PROSPER Imprinting System.
