

KODAK Picture Kiosk GS

Small Investment for Big Impact

If you sell 50 to 90 prints per day, the KODAK Picture Kiosk GS is the perfect choice for you. A cost-effective solution designed for small to mid-sized retail photo printing opportunities, it delivers high quality prints, great printing choices, and the potential for higher margins!

Outstanding Print Quality:

KODAK PERFECT TOUCH Technology enables better, brighter pictures when printed on KODAK XTRALIFE Paper for prints that are stain resistant, water proof, easy to wipe clean and able to last a lifetime.*

**Under typical home display and storage conditions. Based on preliminary image performance testing data.*

Greater Flexibility and Performance:

This kiosk has been designed with the store operator in mind. No matter the configuration, the standardized thermal media roll performance means that your most popular print sizes (10 x 15 cm, 13 x 18 cm and 15 x 20 cm) can be made with the same media roll without the need for staff intervention.

The GS is fast too, letting you deliver 10 x 15 cm prints in just 11 seconds. Swap out of the all-in-one card reader is quick and efficient and can be done in a couple of minutes. Plus, the kiosk fully integrates with your digital minilab or KODAK Adaptive Picture Exchange (APEX) unit.

Smarter Selling Kiosk:

The engaging Attract Loop gives your store a fresh look that keeps your customers informed. With the new Welcome Screen Promotions, you can feature and trial premium products on a beautiful large touch screen. You can also capitalize on more opportunities with the Intelligent Cross Sell that presents customers with additional premium product suggestions.

KODAK Picture Kiosk Software V4.0 raises the industry standard with expanded product offerings that are user-friendly and high in image quality.
