✔ Easy as 1-2-3

Capture the image using your KODAK DC215 Zoom Digital Camera, with 2X optical zoom lens. Insert the camera's KODAK Picture Card into the printer. Press print. It's as easy as that! Vivid colour pictures with the push of a button.

✔ Your Pictures, Your Way.

With the KODAK Personal Picture Maker Kit, you'll be able to do things that were once only possible in a darkroom or with a computer. Lexmark's built-in camera computer allows you to size, crop, edit and personalise your images. An index print lets you view all of the pictures before printing them, allowing you to choose and print only the pictures you want. For best results, use KODAK Inkjet Photo Paper or KODAK Premium Picture Kit for Borderless Prints.

✔ Print without a PC

Create vivid colour pictures without using a computer! Just press the button to print directly from the KODAK Picture card. No uploading. No downloading. No overloading. Plus, there's no software to buy or learn. But if you prefer to use a personal computer, the KODAK Personal Picture Maker connects easily for high quality PC printing.

✔ Print Only the Pictures You Want

The KODAK Personal Picture Maker can print an index of all the pictures on the camera card. This lets you view all of your pictures before printing them so that you can select and print only the pictures you want.

✔ Save Memories in a Zip®

Transfer your pictures from the camera card to an optional Zip drive. An Iomega Zip drive attaches directly to the KODAK Personal Picture Maker's parallel port. By transferring your images to Zip disks, you'll free up the camera card to capture even more memories.

share the
moment
in minutes.

Now when you take pictures with your KODAK DC215 Zoom Digital Camera, you can share prints with family and friends in minutes. With the KODAK Personal Picture Maker PM100 by Lexmark, you can quickly create vivid color pictures with the push of a button. It's the picture-perfect way to enjoy and share those special moments.
