1 Your wireless setup guide

Perform each of these step-by-step procedures to set up your wireless Kodak digital picture frame. Then view and share pictures and videos from your computer – on your frame – wirelessly!

1.	Install and set up Windows Media player 11	page 2
2.	Install and set up EasyShare software	page 10
3.	Set up your wireless frame	page 13
4.	Share your media with your frame	page 17
5.	Set up your gallery account (US, Canada, and Europe only)	page 21

EN

If you have problems with your wireless setup or connection, see Troubleshooting starting on page 25.

2 Install the software

Your frame and Windows Media player 11

IMPORTANT: The EasyShare digital picture frame uses your wireless network and Windows Media player 11 to access the pictures on your computer. If you do not have Windows Media player 11 on your computer, or you have an earlier version, the EasyShare software CD packed with your frame automatically lets you install Media player 11.

What if I already have Windows Media player 11? Go to page 8 to set up media sharing.

How do I find out what version of Windows Media player I have? To find your version number, see the FAQs on page 25.

NEXT: Download and install Windows Media player 11 -

EN

Set up Windows Media player 11

Windows Media player is installed! Now choose your settings.

1 On the Welcome screen, select Custom Settings.

We **strongly** recommend that you select *Custom Settings*. If you choose *Express* settings, the setup will take significantly longer (up to an hour).

- 2 Click Next >
- 3 In the following setup screens (Select Privacy Options; Customize the Installation Options; Select the Default Music and Video Player), we recommend that you accept all options as they are presented, and then click Next > .
- 4 If the Choose an Online Store screen appears, select Don't set up a store now.

We **strongly** recommend that you **do not** choose to set up a store now. If you do, the setup will take significantly longer (up to an hour).

5 Click Einish

A progress screen monitors the setup. When the setup is complete, Windows Media player 11 opens and displays available media files.

NEXT: Share media in Windows Media player 11 ------

Share media in Windows Media player 11

Set up Media Sharing so your frame and Windows Media player recognize each other.

1 Open Windows Media player 11 (if you already had Windows Media player 11 installed and bypassed the installation, page 2).

- 2 Click the **Library** button in the top menu bar.
- **3** Select *Media Sharing* from the drop-down menu.

- 4 In the Media Sharing screen, select Share my media.
- 5 Click or

Install and set up EasyShare software

The CD that was packaged with your frame contains a special version of Kodak EasyShare software that lets you copy pictures between your computer and your frame.

Install EasyShare software now. Even if you already have EasyShare software on your computer, follow these installation instructions to upgrade to this special software version.

The Kodak EasyShare software Install Wizard opens on your computer. If you don't see this first screen, reload the EasyShare software CD that was packaged with your frame.

- 1 Follow the on-screen instructions to install the software.
- **2** IMPORTANT: On the *Select a version to install screen*, make sure you select *CD* installation, not *Web* installation.

10 (EN)

When prompted, take a few minutes to electronically register your frame and software. To register later, visit www.kodak.com/go/register.

IMPORTANT: For Windows XP operating systems, you must restart your computer to compete the installation.

- **3** Select Yes, restart computer now.
- 4 Click Continue

Your computer shuts down. EasyShare software opens when the computer restarts.

NEXT: Set up EasyShare software-

NEXT

1 Follow the on-screen instructions to set up EasyShare software.

When the setup is complete, EasyShare software opens and your pictures are displayed in My Collection.

2 Close EasyShare software by clicking <u>recent</u> in the top-right corner of the screen.

3 Set up your wireless frame

In this section, all buttons and controls, unless otherwise specified, are on the remote control that was included with your frame.

Turn on the frame and select your language

1 Press the power switch to On.

You can leave the switch in the On position and then use the Power button on the remote control to turn vour frame on and off.

13

EN

- 2 Press **1** to highlight your language.
- 3 Press OK.

Connect to your wireless network

The setup screen asks, Do you want to connect this frame to a wireless network?

Setup	- Network connection	
	Do you want to connect this frame to a wireless network?	
		1
	No	
	I don't know	

1 Press **1** to highlight Yes.

If you select No, you can connect to your wireless network later. See page 26.

2 Press OK.

The frame scans for available wireless networks.

NOTE:

If the scan finds multiple networks, your network is usually the first one listed, with the highest %.

3 Press **1** to highlight your network, then press OK.

14 (EN

15

EN

Enter security key (if you have security enabled)

If you have wireless network security enabled, the on-screen keyboard appears and you are prompted to enter your security key. **If not**, — **b go to step 6.**

4 Enter your security key on the on-screen keyboard. On the remote control, press ◆ ♣ to highlight each character. Press OK after each character.

NOTE: A WEP key can be either:

5 or 13 characters (0-9, A-Z, some special characters, case sensitive),

10 or 26 characters (0-9, A-F, not case-sensitive).

A WPA key is 8-63 characters, case sensitive.

The person who set up your network can provide you with this information.

5 Highlight Done on the keyboard, then press OK on the remote control.

The Connecting screen appears, then acknowledges that you are connected!

The Scanning screen appears as the frame scans your network and then lists available computers.

Network Computer		
	Den Computer	6
	Home Computer	

6 Press **‡** to highlight your computer, then press OK.

Congratulations, you've completed your network setup!

17

EN

Share your media with your frame

You're almost done! Now return to your computer and open Windows Media player 11. You'll select your frame as a device with which your computer can share media files (pictures, videos, music).

1 Open Windows Media player 11. Select *Start > Windows Media Player*.

Media Sharing	X		
Share music, pictures, and video on your network.			
Share my media to: Settings	ו		
		— 4	Select your frame.
Kodak EX-811		_ 5	Select "Allow."
		5	Sciect / mow.
Alow Deny Customize			
How does sharing change firewall settings? OK Cancel Apply]		
		— 6	Click "OK" to finish and close.

Your frame is now allowed to access the content on your host computer. Note the icon for your frame now has a green check mark.

18 (EN)

Add shared folders on your computer (optional)

Windows Media player 11 looks for media files (pictures, videos, music) in 2 places on your computer:

- My Documents, these 3 folders: My Music, My Pictures, My Videos
- Shared Documents, these 3 folders: Shared Music, Shared Pictures, Shared Videos

If you have media files in other folders on your computer, share them so you can view them on your frame.

Share folders

- 1 On your computer, open Windows Media player 11.
- 2 Click Library in the top menu bar.
- **3** Select *Add to Library* from the drop-down menu.

The contents of the shared folder are added to the Windows Media player Library. They are now accessible to your frame. Repeat these steps to share other folders.

4 Set up your gallery account

Display pictures directly from the Kodak gallery via the Internet (this feature is currently limited to customers in the US, Canada, and Europe).

Perform this one-time setup on your frame to connect it to your existing Kodak gallery account. Don't have a Kodak gallery account yet? Visit www.kodakgallery.com.

Begin the setup

- 1 On the remote control, press 🕋 , then highlight Settings 🌄 and press OK.
- 2 Select Kodak gallery and press OK.

The gallery setup screen appears.

Setup - Kodak Gallery		
_	Country	
	Username	
the second	Password	

- 3 Press ← n the remote control to highlight Country, then press OK.
- **4** Highlight your country, then press OK.
- 5 Highlight Username/Email address, then press OK.

The username keyboard is displayed on the frame screen.

- 6 Enter your existing gallery username. Use **◆ ↓** to highlight each character of your username (usually your email address). Press OK after each character.
- **IMPORTANT:** To back up or erase characters, use the backspace <-> or the Clear Clear key on the keyboard. DO NOT use the back button on the remote control or you will lose your entries.
- 7 Highlight *Done* on the keyboard, then press the OK button on the remote control.
- 8 Highlight Password, then press OK.
- **9** Enter your gallery password. Press OK after each character. Highlight *Done*, then press OK.
- **10** Press **10** on the remote control. Kodak Gallery **10** appears as a choice on the Home screen. Congratulations, you have completed your gallery setup!

NEXT: View pictures over your wireless network -

www.kodak.com/go/easysharecenter

NFXT

5 View pictures over your wireless network

Congratulations! You're ready to view your pictures on your frame - wirelessly!

1 Make sure your computer and your picture frame are powered on.

2 Press the Home 🛨 button.

It may take up to 10 seconds for your Network Computer 💻 to appear on the Home screen.

3 Press ← ➡ to highlight Network Computer 💻, then press OK.

6 Troubleshooting FAQs

For more information on setting up and using the wireless features of your frame, visit www.kodak.com/go/digitalframesupport or www.kodak.com/go/wifisupport.

Frequently asked questions

I already have Windows Media player on my computer. Do I have to install it again?

You must have Windows Media player 11, or greater, so your frame can access the pictures on your computer.

Check your Windows Media player version number. (Right-click in the top menu bar, then select *Help > About Windows Media Player.*) If your version is earlier than 11, upgrade to version 11. See page 3.

I already have Kodak EasyShare software on my computer. Do I have to install it again?

The CD that was packaged with your frame contains a special version of EasyShare software that lets your computer share pictures with your frame. Install it to upgrade to this special software version. See page 10.

I lost my Internet connection in the middle of my setup. What should I do?

Reconnect to the Internet and repeat the installation and setup, starting on page 2.

I lost my wireless connection in the middle of the setup. What should I do?

Make sure your wireless connection is live and repeat the setup, starting on page 13.

I can't find my network. Why?

- Is your network set up to broadcast SSID? If so, you must enter your wireless network information manually. The person who set up your network can help you with this information.
- Does your network have security enabled (WEP or WPA)? If so, follow the instructions on page 15.

I can't find my network computer. Why?

- Make sure your router and your computer are on.
- Make sure your computer is on your wireless network. See the documentation that came with your router and your computer.
- Is Media sharing enabled in Windows Media player 11? See page 8.
- Is your frame allowed to share content with your computer? See page 17.

I didn't connect to my network the first time I turned on my frame. Can I do it now?

Yes, you can.

- 1 Press Home
 on the remote control, then select Settings > Network > Manual > Enable/disable connections > Enable.
- 2 Press the Back button.
- **3** Select Network > Scan for wireless networks.
- **4** Continue with step 3 on page 14.
