Sodium Diphenylamine Sulfonate Indicator
(SDS Indicator)
- Sodium Diphenylamine Sulfonate,
  \( C_6H_3NHC_6H_4-4-SO_3Na \)
  Also: p-Diphenylaminesulfonic Acid Sodium Salt
  Reagent Grade, ACS Specifications

Preparation

0.01 M Sodium Diphenylamine Sulfonate
1. Add 400 mL distilled water to a 500 mL volumetric flask; stir on a magnetic stirrer.
2. Add 1.4 g sodium diphenylamine sulfonate to the 500 mL volumetric flask; stir to dissolve.
3. Dilute to volume with distilled water and mix.
